

FILEMAKER SERVER 10

SERVER MANAGEMENT SIMPLIFIED!

FileMaker® Server 10 is fast, reliable, easy-to-manage server software for groups of FileMaker Pro users that lets you securely share databases over a network, or on the web. Simply install FileMaker Server 10 on a dedicated computer and upload your FileMaker Pro solutions to the server. Installation and configuration takes just 20 minutes or less. You'll be able to securely manage your databases from anywhere, schedule live back-ups and get 24/7 availability.

New in FileMaker Server 10

Get more time saving tools, maintenance enhancements, and faster ways to create PHP websites

- **New!** Schedule import and export scripts for automated reporting.
- **New!** Send Mail via SMTP directly from FileMaker Server 10 for faster distribution; no email client needed.
- **New!** Schedule automatic database verification tests to check for consistency and errors.
- **New!** Get a snapshot of your database logs to quickly pinpoint trouble spots.
- **New!** Get 10 PHP Site Assistant themes to create visually stunning websites in minutes.
- **New!** Use the built-in PHP Preview to look at your websites before publishing them live.

Manage your data

FileMaker Server 10 is high-performance server software that can be installed and configured in just 20 minutes or less. Using the Admin Console, manage shared databases and automate administrative tasks from virtually any computer on the network. Schedule automated live backups to ensure data integrity and receive email notifications of errors or completed maintenance activities. Best of all, FileMaker Server 10 runs in a mixed Windows and Mac OS X environment.

Share your data

With FileMaker Server 10 you can host your FileMaker database solutions simultaneously on your network allowing large groups of users to share and update critical information while leveraging the stability and faster network performance that only FileMaker Server 10 can provide. Or publish data to the web using PHP or XSLT. The PHP Site Assistant gives you step-by-step guidance in publishing your databases to the web.

Secure your data

FileMaker Server 10 provides robust security features to protect your data. Using SSL protocol, encrypt data transferred between hosted databases and desktop clients. Protect sensitive information by filtering the display of hosted database names based on user privileges. And manage user accounts and passwords efficiently through external authentication via industry standard Active Directory and Open Directory.

Use built-in PHP Site Assistant themes to create visually stunning websites in minutes.

Minimum Requirements

Windows†

Windows Server 2003 Standard Edition SP2;
Windows Server 2008 Standard Edition SP1;
Windows Vista Business SP1

Mac†

Mac OS X 10.4.11 (Intel and Power PC);
